BELKIN® Wireless Pre-N Router

Here's what you need

The Central Connection Point

The Wireless Pre-N Router is the central connection point of your wireless network. Position the Router between your cable or DSL modem and your computers to start sharing your broadband Internet access wirelessly.

For Notebook Computers

A Wireless Pre-N Notebook Network Card connects a notebook computer to your wireless network. **Note:** You must first have a wireless router to establish a wireless network.

For Desktop Computers

A Wireless Desktop Network Card connects a desktop computer to your wireless network. **Note:** You must first have a wireless router to establish a wireless network.

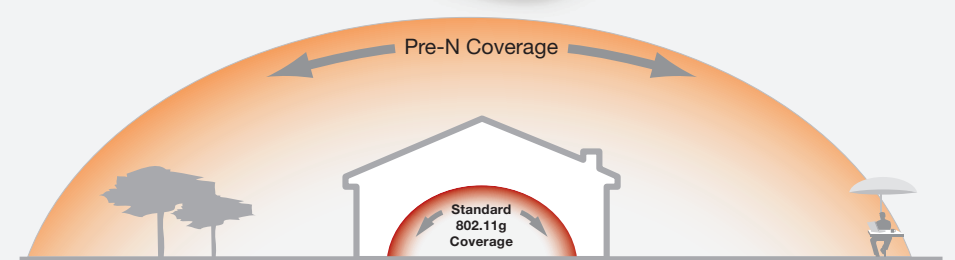

NOTE: If you currently have a computer that is directly connected to the modem, you will not need an additional wireless card/adaptor for that computer.

Benefits

8x greater coverage than standard 802.11g
Belkin Pre-N provides the industry's best wireless coverage, extending your range with improved reliability and fewer drops.

6x greater speeds than standard 802.11g
Belkin Pre-N provides the industry's fastest wireless connection for gaming, streaming video, Voice over IP, and moving large files efficiently and quickly between all the devices in your networked home.

Improved performance of standard 802.11g and 802.11b networking devices
Using a Belkin Pre-N Router or Card with an older 802.11g or 802.11b networking product increases wireless coverage up to 20%.

Improved resistance to wireless interference
Belkin Pre-N products sense potential interference and dynamically shift to the clearest wireless channel available.

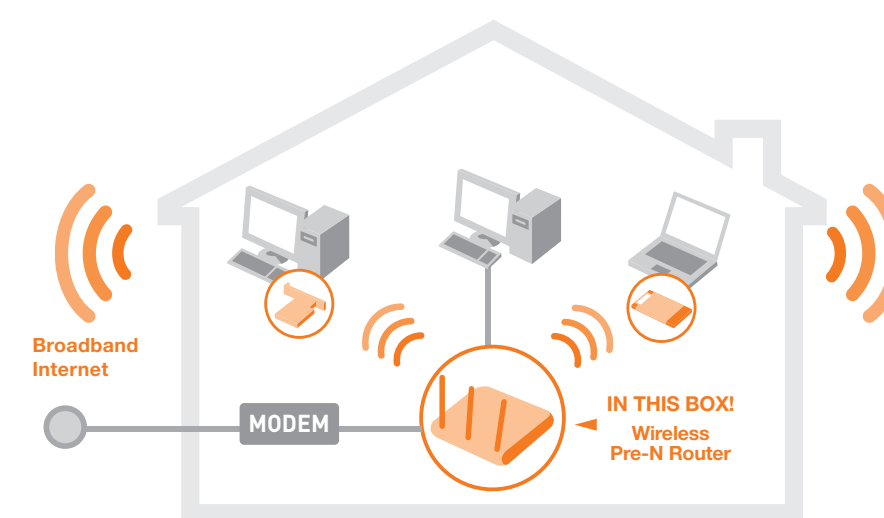

Belkin Pre-N products do not drop to the lowest networking speed in a mixed-mode environment
If a standard 802.11g or 802.11b device is introduced into a Belkin Pre-N network, the Belkin Pre-N product will not drop to the standard 802.11g or 802.11b speeds. Belkin Pre-N products will continue to transmit at a link rate of 108Mbps, a result competing products cannot achieve.

Advanced Security
Wi-Fi® Protected Access (WPA) support provides enhanced encryption protecting your wireless network.

Share your broadband Internet access!

Here's how it works

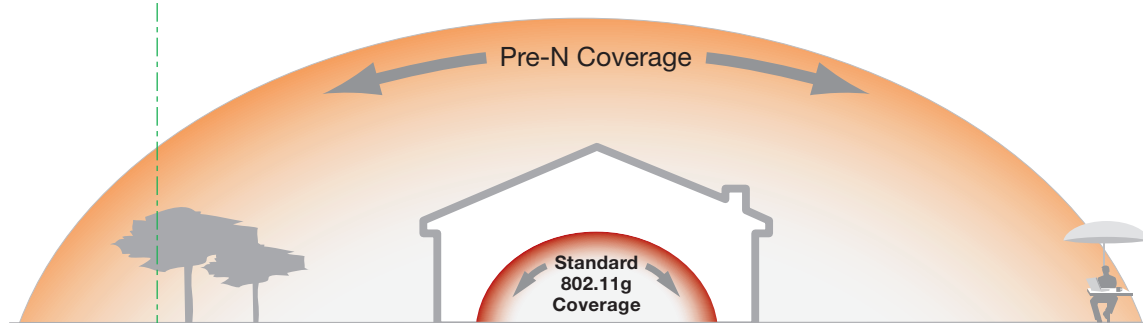

Connect your cable or DSL modem to your Belkin Wireless Pre-N Router to allow your computers to share your broadband Internet access. The Router also lets your computers quickly and efficiently share large files, printers, and hard drives. State-of-the-art security protects both your wireless and wired computers from hackers and intruders. You can add up to 16 computers to your wireless network with additional notebook and desktop adapters.

Network Security

Enhanced Firewall Included

The Belkin Wireless Pre-N Router provides state-of-the-art security. Wi-Fi® Protected Access (WPA) support provides enhanced encryption protecting your wireless network. Stateful Packet Inspection (SPI) and Network Address Translation (NAT) double your firewall and safeguard your network from Internet intruders.

3 Easy Steps

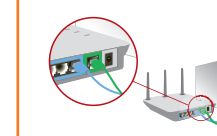

Please refer to the Quick Installation Guide for detailed instructions

1. Install
Insert the CD in your CD-ROM. The Easy Install Wizard will examine your computer settings.

2. Connect
The Easy Install Wizard automatically walks you through connecting the cables from your Router to the computer and modem (cable included).

3. Configure
The software automatically configures the Router to work with your Internet provider.

Package Includes

Wireless Pre-N Router
Quick Installation Guide
Installation CD
User Manual on CD
Power Supply
RJ45 Ethernet Networking Cable

System Requirements

Broadband Internet connection with RJ45 (Ethernet connection)
At least one computer with an installed network interface card
TCP/IP networking protocol installed on each computer
Internet browser

Easy Install Wizard Software Requirements (not required to use Router)
A computer running Windows® 98SE, Me, 2000, XP or Mac OS® 9.x and X v10.x.x
Minimum 4MB of RAM
Internet browser

Specifications:
Standards: IEEE 802.11g, IEEE 802.11b
Wireless Data Rate: 108 Mbps
Security: WPA-PSK 64-bit WEP, 128-bit encryption
VPN Support: PPTP, and IPsec pass-through
Management: Browser-Based
Easy Install Wizard Software: Maximum Users: 253 (LAN), 32 (WLAN)
LEDs: Power, LAN Ports 1-4, Wireless Activity, Internet Connection
